Description

SKI GREEN WITH JOJOBA BASED RENEWABLE SKI WAX

Skis and Snowboards

NEW Unique Super Performance! No Fluorocarbons, jojoba based, universal ski and board treatment. The original rub-in paste wax, no ironing needed. Often called a "hot wax in a can" provides all the performance of a fresh hot wax without the time, expense and potential for damage to your ski base from the hot iron. Makes for easy turning, good control and stay clean bottoms. AN ABSOLUTE MUST FOR SPRING SKIING AND RIDING CONDITIONS.

The easiest and quickest way to treat all skis and boards. Simply rub-in base for smooth, all-day skiing. Best in high humidity snow and changing conditions, when temperatures are 26 F or above. Applicator included.

Bulk purchase of 24 units only.

Available in 110cc., 60cc. and Quarts.

Also, be sure to look for our **NEW MAXX-WAXX label design** at your local ski shop.

Made from a base of **jojoba oil**, a renewable desert plant. Another "Design for the Environment" product from Maxiglide.
